(54) MOBILE PHONE

(57)Abstract:

PROBLEM TO BE SOLVED: To provide a mobile phone having also a reproduction function of music or video information that can reproduce music and a video image at all times independently of ON/OFF of a radio communication function.

SOLUTION: An information reproduction function processing section 20 for music and a video image or the like and a radio communication function processing section 2 are independently stopped on the basis of the operation of power switches 21, 22 through manual operation of a user. Thus, even when a function of the mobile phone is stopped in a train or a hospital, a user can freely enjoy music information and video information stored in a semiconductor memory 5 and the power consumption is reduced to extend the service life of a battery 15.
